

Charles Villard

Front-end Engineer from Miami, Florida

Front-end developer passionate about web standards, static site generators, great phỏ, and taking ownership of user interfaces and component-driven design systems.

Work Experience

Technical Consultant and Front-end Developer, Perficient Aug. 2018 – Present

Supporting clients' efforts to build intuitive content management tools for marketing teams, with the ultimate goal of delivering inviting, accessible, responsive web experiences to end users. Common tools include HTML, SCSS, JavaScript, Vue.js, React, Sitecore, and .NET.

- Collaborate with client teams to build design systems and component libraries that deliver accessible, semantic markup and styles that convey client branding and tone.
- Build single-page applications that support client teams' marketing and sales efforts.

Full-Stack Developer, Tenet Partners June 2016 – Aug. 2018

Maintained the core library and built features for a proprietary framework, BrandEnsemble, used by organizations as a single source of truth for brand identity and usage standards. Common tools included HTML, SCSS, JavaScript, Vue.js, static site generators, and .NET.

- Also customized themes and build traditional and single page applications for client companies using BrandEnsemble to support internal marketing and workflows.
- Additionally built websites and applications for corporations and non-profit organizations using static site generators including Wintersmith, Jekyll, and Gatsby.

Web Developer, Freelance/Contract Feb. 2014 – Present

Providing or supplementing development capabilities for clients ranging from small businesses to startups, on projects including email development and web development. Common tools include HTML, SCSS, JavaScript, static site generators, and WordPress.

- Worked with stakeholders to better understand and define goals, find cost-effective, manageable solutions, and provide maintenance of existing projects.
- Collaborate with designers and stakeholders to build responsive interfaces for marketing and e-commerce tools.
